LUINSOMNIAC PORTFOLIO · DESIGN REFERENCE

Design System

Tokens and shared components for the Lui Frigillana portfolio (Vite + React). Styling: Tailwind v4 — every token below lives in the @theme block of src/index.css (v4's replacement for tailwind.config.js) and becomes a utility class.

01

Colour

--color-primary
#046699
Links, primary buttons, active nav, focus ring
WHITE TEXT 6.6 : 1 · ON BG 6.1 : 1

--color-accent
#E07B1F
The one CTA per page, highlights
NAVY TEXT ON IT 6.1 : 1
NEVER TEXT ON LIGHT BG

--color-bg
#F7F4F3
Page background
INK ON BG 16.6 : 1

--color-surface
#FFFFFF
Cards, panels
INK ON SURFACE 18.0 : 1

--color-ink
#001533
Body text ("text" role) + dark bands
BG TEXT ON INK 16.6 : 1

Derived shades (not extra colours): text-ink/65 · muted text 5.5 : 1 | border-ink/10 · borders | bg-primary/10 · active nav | text-bg/65 · muted on dark 7.5 : 1

Rules

- Blue is never used on navy (2.7 : 1). On dark bands use orange or off-white.
- Orange is never text on the light page (2.7 : 1). The hero "2D" is navy with an orange marker highlight.
- One accent button per page. Everything else is primary or outline.
- Every text/background pair above passes WCAG AA 4.5 : 1 (checked with the WebAIM formula).

03

Spacing & radius

Base unit 8px · Tailwind --spacing: 0.5rem → p-1 = 8px, p-4 = 32px

space-0.5	p-0.5 · 4px		Icon to label, label to input (inside components only)
space-1	p-1 · 8px		**TIGHT — between related items: chip gaps, title to meta**
space-2	p-2 · 16px		Card padding, gap between cards, phone edge
space-3	p-3 · 24px		Button-row gap, tablet edge
space-4	p-4 · 32px		**STANDARD — heading to content, block to block**
space-5	p-5 · 40px		Desktop screen edge
space-6	p-6 · 48px		Section padding on phone
space-8	p-8 · 64px		Section padding on desktop

FOR THE GUIDE
Tight spacing: 8px (--space-1)
Standard spacing: 32px (--space-4)
Screen edge: 16px phone · 24px tablet · 40px desktop
Max content width: 1440px (--container-page → max-w-page)

RADIUS

radius-sm · 8px	radius-lg · 16px	radius-full
Buttons, inputs, nav links	Cards, images, video	Chips, CTA, badge

04

Components

Button ATOM

Appears on: Header, Home, Museum, 3D Showcase, Footer

Step into the Museum → | Get in touch | Let's collaborate

```
variant: "primary" | "outline" | "accent"
href → renders <a> · onClick → renders <button>
children
```

Chip ATOM

Appears on: Home, Museum, About

ALL · 12 | BACKGROUND | BLENDER

```
children · selected? · onClick?
onClick → <button aria-pressed> (Museum filter)
no onClick → static label (software tags)
```

IconButton ATOM

Appears on: Header (menu), Lightbox on Home + Museum

```
icon · label (required → aria-label)
· onClick
40 × 40px touch target
```

WorkCard MOLECULE

Appears on: Home (Featured), Museum, 3D Showcase (More models)

Diner prop set 3D | Diner prop set 3D | Arcade cabinet 12.4K TRIS

```
Shown: default · focus ring (Tab key) · as a 3D model card
title · imageUrl · meta ("3D" or "12.4K tris") · onOpen
Rendered as a <button> that opens the Lightbox · Image inside is lazy-loaded
Below 768px: meta stacks under the title
```

SectionHeader MOLECULE

Appears on: Home, Museum, 3D Showcase, About

The Museum
Every room, newest first. Filter by discipline.
Featured works — See all →

```
title · level ("page" = <h1> Display | "section" = <h2> Heading)
description? · action? { label, to }
```

Other shared components

Image	ATOM	everywhere	src · alt (required) · ratio? · lazy-loads below the fold
Logo	ATOM	Header, Footer	size?
NavLink	MOLECULE	Header, Footer	to · children → active state automatic
SocialLink	MOLECULE	Footer, About	platform · href
MasonryGrid	ORGANISM	Home (3 col), Museum (4 col)	children · columns
Lightbox	ORGANISM	Home, Museum	work · onClose · onPrev · onNext → native <dialog>
Header / Footer	ORGANISM	every page via Layout	none → read nav + profile data

Single-screen (built from the pieces above, not in the system): Hero, ReelSection, ServiceCard, AboutSummary, FilterBar, ModelViewer, PassThumb, ModelDetails, Timeline, ContactBlock.

05

Responsive plan

Phone · base (< 768px)
no prefix

Hamburger · character on top · buttons full width · masonry 2 col · services 1 col · chips scroll sideways

Tablet · md: (≥ 768px)
md: 48rem

Still hamburger · hero 2 col · Museum 3 col · services 2 × 2 · About portrait left

Desktop · lg: (≥ 1024px)
lg: 64rem

Full nav + CTA · Featured 3 col · Museum 4 col · services 4 across · 3D Showcase sticky sidebar

MOBILE-FIRST RULES

- Two breakpoints only: md 768px and lg 1024px (min-width). Base styles are the phone layout.
- No horizontal page scroll at 375px: 16px edges leave 343px; nothing fixed-width is wider.
- The chip row scrolls inside itself; the page never does.
- Display/Heading sizes shrink with clamp(), so long titles wrap instead of overflowing.
- No body { overflow-x: hidden } — overflow bugs must be visible so they get fixed.

```
@theme {
  --breakpoint-*: initial;   /* remove sm, xl, 2xl */
  --breakpoint-md: 48rem;    /* 768px  */
  --breakpoint-lg: 64rem;    /* 1024px */
  --container-page: 90rem;   /* 1440px */
}
```

06

Accessibility check

- [x] **Every text-on-background pair passes 4.5 : 1**
 Ink, muted ink (65%), primary and navy-on-orange all pass (5.5 – 18 : 1). Blue never on navy; orange never as text on light.
 FIXES: WHITE-ON-ORANGE CTA 2.94, GREY CAPTIONS 2.98, SUBTITLE 4.47

- [x] **Real semantic elements**
 Layout renders <header>, <nav>, <main>, <footer>. Button → <a> or <button>. WorkCard and PassThumb are <button>s. SectionHeader gives one <h1> per page, <h2> per section.
 FIXES: 3D SHOWCASE PASS THUMBNAILS WERE <DIV ONCLICK>

- [x] **Every meaningful image has alt text**
 Image makes alt required. Artwork alt = title + category; portrait and 3D character described; decorative shapes use alt="".
 ENFORCED BY THE IMAGE COMPONENT

- [x] **Every form input has a matching <label>**
 No forms on the 4 public pages (Admin is out of scope). Rule for any future contact form: <label htmlFor> + matching id, never placeholder-only.
 RULE RECORDED FOR LATER

- [x] **Every link and button reachable by Tab, with visible focus**
 Global focus-visible style: 3px primary outline, 2px offset (the WorkCard focus variant). Hamburger has aria-expanded; Lightbox is a native <dialog> (Esc closes, focus stays inside); filter chips use aria-pressed. Add a "Skip to content" link as the first Tab stop.
 FIXES: NO FOCUS STYLES ANYWHERE ON THE CURRENT PAGES
